Reputation Analysis

MXToolbox :

-Listed on 1 of 60 blacklists

- UCEPROTECT Level 3

VirusTotal :

-0/91 vendors detected as malicious

- Community Score: 0

- ASN: DigitalOcean (AS14061)

WHOIS :

-Organization: DigitalOcean, LLC

- Country: United States

Conclusion

The investigation identified several Indicators of Compromise (IOCs), including a suspicious IP address, domains, email addresses, and a phishing URL. Although VirusTotal did not flag the sender IP as malicious, MXToolbox reported it on an email blacklist. The IP belongs to DigitalOcean, a legitimate cloud provider that is commonly abused by attackers to host phishing infrastructure. Based on these findings, the email should be treated as suspicious and investigated further.
